Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 10, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (6,256,831). Chen shows a cleaning device capable of being used by animals for paw cleaning comprising a support layer 22 adapted to conform to the contours of a paw and to retain fluid and a permeable cover 21 adapted to retain dirt and debris adjoining at least an upper portion of the support layer 22. It is considered that the sink or bathtub where this cleaning device is intended to be used qualifies as a basin having a bottom wall and an upstanding peripheral rim defining a holding area. With respect to claim 1, to use a basin with the cleaning device of Chen would have been obvious to one skilled in the art in order to more efficiently use the cleaning device and to reduce the amount of cleaning of the area after use of the device.

Claims 2-4, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen in view of Olson (6,793,434). Chen does not show the use of a cleaning fluid. Olson teaches a cleaning device having a support layer 108 which retains cleaning fluid to be released when the support layer 108 is compressed to moisten and clean, col. 10, lines 16-53. With respect to claims 2-4, 8 and 9, to use the cleaning fluid

of Olson with the cleaning device of Chen would have been obvious to one skilled in the art in order to more efficiently clean the person or animal using the device.

Allowable Subject Matter

Claims 5-7, 11, 12 and 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

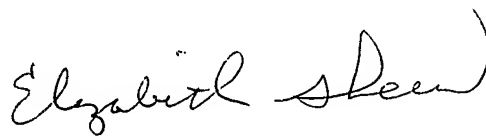

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Mendel (1,220,441), Shreve (1,238,349), Nicholas (4,008,688), Hsieh et al (6,180,035), You (6,199,240), Laner (6,463,885), Otsuji et al (6,578,520) and Coppa (2004/0078909).
